Art Unit: 2651

Prior Art Cited

Reference to Forbord (5,991,124) cited as of interest.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: Applicant's claimed invention differs from the prior art of record because: Reference to Huang et al (Pat. No. 6,104,581) discloses a head stack assembly for reading and writing to the disk, including a body portion; an actuator arm cantilevered from the body portion (see fig.2); a coil portion including a coil assembly having a first wound coil and a second wound coil as claimed (see figs. 4a-6b). Prior art of the record fails to further disclose a switching circuit electrically coupled to the single supply of voltage and to the first and second pairs of coil leads, the switching circuit being configured to selectively switch the first and second wound coils between a first configuration and a second configuration in which the first wound coil is electrically in parallel with the second wound coil, the second configuration being different from the first configuration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
